

IXL PROGRAM FOR YOU TO USE AT HOME!

Helps Build Your Child's Math and English Skills

Last year, the PTO invested in a 3-year subscription to IXL Learning, an online company with tutorials in Math (from PreK to PreCalculus) and Language Arts (2nd-10th grade skills). Many of our teachers were already using this program on a trial basis. Now, our students in grades 1-6 have access to IXL 24-hours a day, 7 days a week!

Get your child started now! Simply access the IXL link on the Arlington Schools website under the Parents/Students link. Once you click on the link, the Username is the last two digits of your child's graduation year, the first four initials of your last name and the first initial of your child's first name (e.g. 4th grader Ron Smith's username would be "24smitr"). The password is his/her lunch (PIN) number. From that point, children can choose their grade and topic of interest (addition, multiplication, money, fractions, etc). Completing math problems earns the children rewards within the system and their time spent using IXL can be reported back to their teachers. We hope you find this program as helpful and fun as many of our homeroom teachers and students do!"
