

STUDENT TRANSPORTATION IN PRIVATE VEHICLES

Since the board will attempt to provide a school bus for reasonable student transportation request by a teacher, the use of student or family automobiles for school activities should not be necessary and will be strongly discouraged. In exceptional or emergency cases, specific permission from the superintendent will be required.

The board of education will procure insurance covering the personal liability of teachers, employees, or parents transporting students in their own vehicles. For the protection of all concerned, including the students, such parents, teachers, and other school employees should carry adequate liability insurance as well as insurance to cover medical expenses related to injuries received regardless of liability.

LEGAL FEES.: ORC 3327.01; 3327.02; 3327.09
