

COMMUNICABLE DISEASES

All students with signs or symptoms of diseases suspected as being communicable to others are given immediate attention and sent home if such action is indicated.

Any student suspected or reported to have a communicable disease shall be excluded from school according to the Ohio Department of Health's Communicable Disease Chart. This chart describes control measures to be observed. The local public health nurse can be consulted in case questions arise.

Parents will be informed when a communicable disease of a serious nature and of significant public health concern (ie: diseases that fall under Class A of the ODH reportable Infectious Disease List) occurs in their child's classroom or on the bus so that early signs or symptoms can be observed and appropriate preventative measures can be instituted.
