

RELATIONS WITH COLLEGES AND UNIVERSITIES

The board views education as a lifelong process. The board also believes that education is a key element in the pursuit of a successful and satisfying life. Thus, the board directs the superintendent and staff to pursue opportunities for the students of the district to be involved in cooperative efforts with colleges and universities. As far as practicable and possible, arrangements should be developed for students to enroll in college and university courses and programs. In no way, however, should such endeavors delay a student's completion of graduation requirements.
